

MR957-1411
Appln. No. 10/690,600
Reply to Office Action dated 9/22/2005

Remarks/Arguments

This case has been reviewed and analyzed in view of the Official Action dated 22 September 2005. In the Official Action, the Examiner has found four inventions, namely, Species A directed to monomers; Species B directed to organic compounds; Species C directed to template molecule; and Species D directed to a detecting method. The Examiner has required that Applicant chose one Species for further prosecution in this case.

By this Amendment and Response, Applicant has withdrawn Claim 12 and elects Claims 1-11 which Applicant believes reads on Species D directed to a detecting method.

It is now believed that the subject patent application has been placed in condition for examination and such action is respectfully requested.

Respectfully submitted,
FOR: ROSENBERG, KLEIN & LEE
